Decision and Rationale on Action

I have decided to implement the proposed action, of conducting environmental studies, pre-development scouting, exploration well preparation and inspection, and other activities in the National Petroleum Reserve Alaska (NPR-A) as amended by project specific stipulations to be conducted by ConocoPhillips Alaska, Inc. on land managed by the Bureau of Land Management (BLM). The applicant will be provided with stipulations entitled "FF095671 and FF095712 ConocoPhillips Summer Permit Studies 2013 Stipulations."

In addition, I have reviewed the plan conformance statement and have determined that the proposed action is in conformance with the approved land use plans and that no further environmental analysis is required under the National Environmental Policy Act (as documented in the attached CX, NEPA Compliance).

The evaluation and finding done to comply with Section 810 of ANILCA found no significant restrictions to subsistence use.

The assessment of Archaeological and Historic Resources completed for this project found that the standard stipulation package would provide sufficient protection and that the action may proceed.

Implementation Date

This project will be implemented on or after May 17, 2013.
